UTV Gun Rack Mounting:
1. Using the Torx wrench provided in your Polaris 400cc tool bag, remove the (4) ¼” Torx screws from the floor of the UTV as shown below.

2. Take the left plate and attach to the left side holes and using (2) of the ¼” x 1.00” truss head bolts. Loosely secure to the floor at this point.
3. Attach the right plate to the right side floor using (2) ¼” x 1.00” truss head bolts. Loosely attach as adjustments will need to be made once completely assembled.
4. Place the 1.50” tube, from the 20073 kit, in-between the plates and attach using the hardware in the 20073 BOM.
5. Follow instructions in the 20073 to finish mounting the UTV Gun Rack to your Ranger floor.
6. Once the 20073 is completely installed be sure to tighten all hardware securely, including the floor mount hardware. Failure to do so could result in damage to your weapons.

UTV Gun Rack Use:
- Place the Gun into the Kolpin UTV Gun Mount and secure with the Rubber strap.
- The UTV Gun Mount is designed to carry your Guns safely and securely from one destination to the next.

CAUTION: Always make sure gun is unloaded and pointed in a safe direction before traveling.
CAUTION: Check with local authorities to make sure you are able to travel with uncased weapon.
