Before you begin, please read these instructions and check to be sure all parts and tools are accounted for. The following instructions contain details required to install and service the contents of this kit.
OPERATING INSTRUCTIONS

Congratulations! You’ve just purchased the most durable accessory component in the industry. Our accessories work great all year round! With proper care and maintenance, your Kolpin accessory will last for years to come! Please read and understand all assembly instructions, notices and warnings before assembling and using your Kolpin accessory.

Follow these guidelines to ensure a successful and satisfactory installation:

Read, understand this manual before beginning installation
Periodically check for wear and tightness of all fasteners.
Replace or re-torque fasteners as necessary.

SAFETY & GENERAL PRODUCT INFORMATION

Kolpin accessories are designed with your safety in mind.

In order to protect you and your vehicle, certain parts of the accessory and/or hardware may be designed to collapse or break when the equipment is over-stressed.

Kolpin winch mount kits are designed to be compatible with Kolpin and Cycle Country winches along with many others, but may not be compatible with some winches. Kolpin winch mount kits have design features that benefit snow plow applications.

! DANGER ! ! WARNING ! ! CAUTION !

To avoid personal injury or damage to your vehicle:

Read and understand all notices for:
Caution
Warning
Danger

Follow instructions for your vehicle, winch, winch mount and other items used in combination with this product.
Do not winch unsecured loads at any time.
Disconnect battery during winch installation or service to prevent electrical hazards.
Do not lift loads overhead.
Do not exceed the load capacity of the winch.
Always wear gloves when handling wire winch cable.
Do not use your winch or winch mount for towing.
Do not shock load the winch, cable or winch mount.
Keep fingers, hands and loose clothing away from roller fairlead and winch cable drum when in use.

BEFORE YOU BEGIN:

• Your Kolpin accessory is exclusively designed for your vehicle
• Please read and understand all instructions
• Verify all parts and tools are accounted for
• To ensure a satisfactory installation, follow all steps correctly and in the sequence described
• Keep these instructions for future reference or for informational requests
• To facilitate installation, make sure that your vehicle is clean and free of debris
• All directions referring to right and left are when the rider is sitting on the machine

TOOLS REQUIRED:

• Basic Metric wrench and socket set
• Pliers
• Hand Torque Wrench
• Do not use impact tools to install hardware

APPROXIMATE ASSEMBLY TIME: 30 minutes

Note: Additional time may be required to accommodate other installed accessories.

Note: If any hardware is missing, do not return to the store. Call us to help, Toll Free 1-877-956-5746.

Mount Installation:

1. Shift vehicle transmission into NEUTRAL or apply the vehicle PARKING BRAKE. Turn ignition key to OFF position and remove from ignition switch. Disconnect black negative (-) cable from battery.

2. Remove the plastic bumper guard and save for reinstall later.

3. Using the hardware supplied with the winch kit, mount the winch assembly onto the winch mount plate (item #1). The roller fairlead adapter plate supplied with the winch kit will not be used in this application. **Note, the winch motor should be on the right side of the ATV when mounted and that the cable feeds from the bottom side of the drum spool and winch base.**

4. Carefully slide the winch and mount assembly up behind the headlights of the ATV as shown. Set the winch mount plate onto the two mainframe tubes. (See illustration 1-1). **NOTE, winch must be attached to the mount plate before it is installed into vehicle. Make sure the winch clears the headlight back covers.**

5. Place the M8 u-bolts (item #4) around the upper portion of the main frame tubes and insert threads thru mount plate. Fasten u-bolts with locknuts (item #6) as shown. (See illustration 1-1). Tighten M8 fasteners to specification.

6. Position the roller fairlead mount plate (item #2) behind the front brush guard and above the lower brush guard tubes. Install using M6 u-bolts (item #3) for top holes and M8 u-bolts (item #4) for bottom holes. Fasten u-bolt threads with M6 locknuts (item #5) and M8 locknuts (item #6) as shown. (See illustration 1-2). Tighten fasteners to specification.

7. Reinstall the plastic bumper guard.

8. Feed the winch cable end thru the mount plate (item #2) and then thru the roller fairlead (supplied with winch kit). Using fasteners supplied with winch kit, attach the roller to the mount plate as shown. (See illustrations 1-2 and 1-3). Tighten M8 fasteners to specification.

9. Connect the hook to cable or rope by using hardware included in winch kit.

Winch Wiring and Connections:

10. Using the winch kit instructions, route and connect the electrical cables and components for the winch system.

11. Secure all harnesses using cable ties (provided with winch kit) to prevent contact with hot components, sharp edges or moving parts.

12. Reconnect black negative (-) cable to battery.
One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer’s control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer’s warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
