WINCH MOUNT KIT

FOR HONDA RINCON ATV

P/N 25-1190

ASSEMBLY / OWNERS MANUAL

Application

WINCH KIT NO. 25-9xxx

Before you begin, please read these instructions and check to be sure all parts and tools are accounted for. The following instructions contain details required to install and service the contents of this kit.
OPERATING INSTRUCTIONS

Congratulations! You’ve just purchased the most durable accessory component in the industry. Our accessories work great all year round! With proper care and maintenance, your Kolpin accessory will last for years to come! Please read and understand all assembly instructions, notices and warnings before assembling and using your Kolpin accessory.

Follow these guidelines to ensure a successful and satisfactory installation:

Read, understand this manual before beginning installation
Periodically check for wear and tightness of all fasteners.
Replace or re-torque fasteners as necessary.

SAFETY & GENERAL PRODUCT INFORMATION

Kolpin accessories are designed with your safety in mind.

In order to protect you and your vehicle, certain parts of the accessory and/or hardware may be designed to collapse or break when the equipment is over-stressed.

Kolpin winch mount kits are designed to be compatible with Kolpin and Cycle Country winches along with many others, but may not be compatible with some winches. Kolpin winch mount kits have design features that benefit snow plow applications.

BEFORE YOU BEGIN:

- Your Kolpin accessory is exclusively designed for your vehicle
- Please read and understand all instructions
- Verify all parts and tools are accounted for
- To ensure a satisfactory installation, follow all steps correctly and in the sequence described
- Keep these instructions for future reference or for informational requests
- To facilitate installation, make sure that your vehicle is clean and free of debris
- All directions referring to right and left are when the rider is sitting on the machine

TOOLS REQUIRED:

- Basic Metric wrench and socket set
- Pliers
- Hand Torque Wrench
- Do not use impact tools to install hardware

APPROXIMATE ASSEMBLY TIME: 30 minutes

Note: Additional time may be required to accommodate other installed accessories.

Note: If any hardware is missing, do not return to the store. Call us to help, Toll Free 1-877-956-5746.
Installation Prep:

1. Shift vehicle transmission into PARK or apply the vehicle PARKING BRAKE. Turn ignition key to OFF position and remove from ignition switch.
2. Disconnect black negative (-) and red positive (+) cables from battery.

![WARNING]

**ALWAYS** disconnect black negative (-) cable from battery FIRST. Failure to do so will result in high current electrical arc, and may result in battery explosion if tool touches grounded frame. Death or serious injury may occur.

3. Remove the black plastic shroud from ATV bumper. Retain parts for reinstall later.

Mount Installation:

4. Insert the winch mount plate (item #1) into the front opening of the ATV and position on top of the frame tubes as shown. Fasten plate using u-bolts (item #2) with locknuts (item #5). Use washers (item #4) over the slotted holes. (See illustration 1-1). **Do not tighten fasteners at this time.**

5. Position the winch under the mount plate and check for interference. If interference occurs between the winch gear casing and the horizontal tube of the bumper frame, use spacers (item #6) as needed to eliminate the interference as shown. The spacers will help offset winch body from mount plate. (See illustration 1-2).

6. Secure winch with M8 mount bolts (item #7) through the mount plate and into the winch body holes as shown. Loosely tighten the bolts.

7. Re-verify the position of the assembled winch and mount plate front-to-back to remove any interference.

8. Feed the winch cable through the roller fairlead (supplied with winch kit) and attach assembly to the mounting plate using fasteners supplied with winch kit. (See illustration 1-3).

9. Tighten all fasteners to specification.

![8MM FASTENER TORQUE:]

8MM FASTENER TORQUE:
17 ft. lbs. (23 Nm)

10. Using OEM fasteners, re-install the bottom plastic shroud removed previously.
Winch Cable Wrap Installation on Spool Drum:

11. The winch cable or rope should be wrapped around the spool drum as shown. Spooling the cable as shown will prolong cable life and enhance winch performance. (See illustration 1-4).

12. Connect the hook to cable or rope by using hardware included in winch kit.

Winch Wiring and Connections:

13. Using the winch kit instructions, route and connect the electrical cables and components for the winch system.

14. Secure all harnesses using cable ties (provided with winch kit) to prevent contact with hot components, sharp edges or moving parts.

15. Reconnect battery red (positive) and black (negative) cables to battery terminals at this time.

16. With vehicle key in the ON position, check winch for proper operation.
One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer's control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer's warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
