Before you begin, please read these instructions and check to be sure all parts and tools are accounted for. The following instructions contain details required to install and service the contents of this kit.
OPERATING INSTRUCTIONS

Congratulations! You’ve just purchased the most durable accessory component in the industry. Our accessories work great all year round! With proper care and maintenance, your Kolpin accessory will last for years to come! Please read and understand all assembly instructions, notices and warnings before assembling and using your Kolpin accessory.

Follow these guidelines to ensure a successful and satisfactory installation:

Read, understand this manual before beginning installation
Periodically check for wear and tightness of all fasteners.
Replace or re-torque fasteners as necessary.

SAFETY & GENERAL PRODUCT INFORMATION

Kolpin accessories are designed with your safety in mind.
In order to protect you and your vehicle, certain parts of the accessory and/or hardware may be designed to collapse or break when the equipment is over-stressed.

Kolpin winch mount kits are designed to be compatible with Kolpin and Cycle Country winches along with many others, but may not be compatible with some winches. Kolpin winch mount kits have design features that benefit snow plow applications.

! DANGER !  ! WARNING !  ! CAUTION !

To avoid personal injury or damage to your vehicle:

Read and understand all notices for:
  Caution
  Warning
  Danger

Follow instructions for your vehicle, winch, winch mount and other items used in combination with this product.
Do not winch unsecured loads at any time.
Disconnect battery during winch installation or service to prevent electrical hazards.
Do not lift loads overhead.
Do not exceed the load capacity of the winch.
Always wear gloves when handling wire winch cable.
Do not use your winch or winch mount for towing.
Do not shock load the winch, cable or winch mount.
Keep fingers, hands and loose clothing away from roller fairlead and winch cable drum when in use.

BEFORE YOU BEGIN:

- Your Kolpin accessory is exclusively designed for your vehicle
- Please read and understand all instructions
- Verify all parts and tools are accounted for
- To ensure a satisfactory installation, follow all steps correctly and in the sequence described
- Keep these instructions for future reference or for informational requests
- To facilitate installation, make sure that your vehicle is clean and free of debris
- All directions referring to right and left are when the rider is sitting on the machine

TOOLS REQUIRED:

- Basic Metric wrench and socket set
- Pliers
- “Torx” bit socket or hand tools
- Pry Bar or Guide Pin to align parts
- Do not use impact tools to install hardware

APPROXIMATE ASSEMBLY TIME: 30 minutes

Note: If any hardware is missing, do not return to the store. Call us to help, Toll Free 1-877-956-5746.

Installation Prep:
1. Remove the front bumper from the vehicle by removing the four upper arm bolts and 3 lower bolts.
2. Place the bumper on a suitable location to work, such as a large work bench or the floor.
3. Remove the two plastic radiator guards (items b & c) as shown. (See Illustration 1-1).
4. Retain all OEM hardware, some will be re-used.

Winch Mount Installation:
1. Assemble the Mount Plate, item #3, to the left and right brackets, items #2 & #4, using M8 Carriage bolts, item #9, flat washers, item #7, and M8 nuts, item #8, as shown. (See Illustration 2-1).

8MM FASTENER TORQUE:
17 ft. lbs. (23 Nm)
Winch Assembly:
1. Assemble your winch and winch mount according to the directions and using the hardware included with your winch. (See Illustration 3-1).
2. If installing a wide spool 4000lb/4500lb winch, use the wide mount pattern holes.

Contactor Assembly (Optional):
1. The winch mount includes a feature on the back side of the winch plate to mount most contactors (item B) if preferred. Use hardware included with winch kit to install contactor. (See Illustration 3-2).

Winch Mount and Bumper Assembly:
1. Install the winch mount assembly (item C) to the front bumper (item D).
2. Use M8 bolts, item #10, flat washer, item #7, and M8 nut, item #8. (See Illustration 3-3).

8MM FASTENER TORQUE:
17 ft. lbs. (23 Nm)
Roller Fairlead and Mount Assembly:

1. Install the roller fairlead and hardware included with your winch to the Roller Fairlead Mount, item #1, using M6 bolts, item #5, washer, item #11, and M6 nuts, item #6, as well as the OEM torx head screws (item A) as shown. (See Illustration 3-4).

2. If installing a wide spool 4000lb/4500lb winch, use the wide mount pattern holes.

3. Route your winch cable through the rollers and install the clevis hook. Note, one of the long rollers may need to be removed to complete this step.

Re-Install Front Bumper and Winch Assembly:

1. Re-install the front bumper and winch assembly using the OEM hardware.
One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer's control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer's warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
