**Installation Instructions:**

1. Shift vehicle transmission into PARK and set E-BRAKE. Turn key to OFF position and remove from vehicle.

2. Carefully remove Rear Windshield Panel from the box and place on a clean flat surface that won’t scratch the Windshield. We recommend leaving the protective film on both sides of the Rear Windshield Panel during assembly, except for areas where the mounting components are attached.

3. The two mounting tabs on the lower two corners of the Rear Windshield Panel will need to be bent by hand so they are aligned with the adjoining surface on the Windshield. Exact bend angle can be adjusted once lower Clamps are attached to vehicle in Step 10. See Illustration 1-1.

4. Cut a 7-7/8” (200mm) length piece from the Self Adhesive Foam [Item 6].

5. Attach the longer piece of Self Adhesive Foam to the bottom edge of the Windshield Panel that will face the bed of the vehicle. See Illustration 1-2.
6. Attach the 7-7/8” (200mm) piece of Self Adhesive Foam onto the center of the Windshield Panel that will face the front of the vehicle, in the location along the bend where it contacts the tubing behind the center head rest. Alternatively, the Self Adhesive Foam can also be attached to the tubing behind the center head rest instead of the Rear Windshield Panel. See Illustration 1-3.

7. Attach the two upper Clamps [Item 2] to the driver and passenger side of the Roll Cage. The Kolpin logo on the Clamps should face the outside of the vehicle. Each Clamp uses one M6 Lock Washer [Item 4] and one M6 x 18mm Button Head Screw [Item 3]. Do not fully tighten Clamps, exact position may need to be adjusted. See Illustration 1-4.

8. Tilt the bed of the vehicle. Attach the Rear Windshield Panel to the Clamps from Step 7. Each Clamp uses two M6 Domed Shoulder Washers [Item 5], two M6 Lock Washers [Item 4] and two M6 x 18mm Button Head Screws [Item 3]. Do not fully tighten, exact position may need to be adjusted. See Illustration 1-4.

9. Before assembling the two lower Clamps, be sure that the bottom of the Rear Windshield Panel is tucked in front of the OEM firewall, towards the front of the vehicle. See Illustration 1-5.

10. Attach the two lower Clamps to the driver and passenger side of the Roll Cage and the Rear Windshield Panel. The Kolpin logo on the Clamps should face the outside of the vehicle. Align the Clamps with the bent mounting tabs from Step 3. Each Clamp uses three M6 x 18mm Button Head Screws [Item 3], three M6 Lock Washers [Item 4], and two M6 Domed Shoulder Washers [Item 5]. Do not fully tighten Clamps, exact position may need to be adjusted. See Illustration 1-5.

11. Adjust the position and alignment of the Rear Windshield Panel as necessary and tighten all Hardware to the specified torque below.

</tr>
</tbody>
</table>

12. Remove the protective film from BOTH sides of the Windshield Panel. Protective film may be clear on one or both sides which can be difficult to notice.

13. Re-inspect hardware before and after riding or trailering.
Windshield Cleaning Information:

- Remove all dirt, mud, dust and debris from Windshield with water before cleaning.
- Use a mild soap or dishwashing detergent along with a soft sponge or soft cotton cloth to clean Windshield surface. Do not apply in direct sunlight. Rinse with water immediately and dry with a soft cotton cloth or chamois.
- Always test cleaning agents in a small inconspicuous area prior to cleaning entire panel.
- Never use Windshield cleaning fluids (409, Windex, etc.), gasoline, high alkaline cleaners, or solvents.
- Never use abrasives, brushes, razor blades, scrapers, squeegees, gloves or dirty cloths.

For additional assistance, please contact Kolpin customer service department at (877) 956-5746 or (763) 478-5800 or email customerservice@kolpin.com.

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer’s control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer’s warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
