*Extra Component Quantity Supplied Can Be Discarded
Assembly Time: Approximately 25 minutes

Important: This product is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.

Installation Instructions:

1. Shift vehicle transmission into PARK. Turn key to OFF position and remove from vehicle.
2. Carefully remove Windshield Panels from box and place on a clean flat surface that won’t scratch the Panels. We recommend leaving the protective film on both sides of the Windshield Panel during assembly and only partially peeling it back in locations where mounting components are attached.
3. Leave all hardware finger tight to allow for adjustments and tighten as indicated during final steps.

5. Attach the two Clamps [Item 2] to the Upper Panel [Item 1]. See Illustration 1-2.
6. Remove the top OEM Nut on the back of the Headrests and replace with the Threaded Coupling Nut [Item 13]. Re-tighten. The OEM Nuts will not be re-used. See Illustration 1-3.

7. Attach the Windshield assembly onto vehicle Roll Cage using the two Clamps [Item 4]. Insert one Clamp Spacer [Item 5] between each Clamp and the Roll Cage, then insert hardware as shown. The two remaining Clamp Spacers [Item 5] can be discarded. See Illustration 1-4.

8. **Optional Step**: Cut two 12” (305mm) long pieces of Adhesive Backed Foam and attach to the inside of the Upper Panel where the Panel can come in contact with the Roll Cage. See Illustration 1-5.
9. Tilt the bed up on the vehicle to access the mounting hardware for the OEM Seats.

10. Remove the five OEM Screws from Seatback and replace with supplied hardware as shown. OEM Screws will not be re-used. See Illustration 1-6.

![Illustration 1-6]

11. On both Headrests, position the Nylon Spacer [Item 11] between the Threaded Coupling Nut [Item 13] and the Upper Panel. Then insert the Domed Shoulder Washer [Item 9], Lock Washer [Item 8], and Button Head Screw - M6 x 26mm [Item 7]. See Illustration 1-7.

![Illustration 1-7]

12. Assure the Windshield is aligned evenly before tightening hardware.

13. Tighten all hardware to the torque specification below.

![Specified Fastener Torque]

SPECIFIED FASTENER TORQUE:
7 ft. lbs. (84 in-lb) (9.5 Nm)

14. Remove the protective film from BOTH sides of the Windshield Panel. Protective film may be clear on one or both sides which can be difficult to see.

15. Re-inspect hardware before and after riding or trailering.
Windshield Cleaning Information:

- Remove all dirt, mud, dust and debris from Windshield with water before cleaning.
- Use a mild soap or dishwashing detergent along with a soft sponge or soft cotton cloth to clean Windshield surface. Do not apply in direct sunlight. Rinse with water immediately and dry with a soft cotton cloth or chamois.
- Always test cleaning agents in a small inconspicuous area prior to cleaning entire panel.
- Never use Windshield cleaning fluids (409, Windex, etc.), gasoline, high alkaline cleaners, or solvents.
- Never use abrasives, brushes, razor blades, scrapers, squeegees, gloves or dirty cloths.

For additional assistance, please contact Kolpin customer service department at (877) 956-5746 or (763) 478-5800 or email customerservice@kolpin.com.

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer’s control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer’s warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
