**Installation Instructions:**

1. Shift vehicle transmission into PARK and set E-BRAKE (if equipped). Turn key to OFF position and remove from vehicle.

2. Carefully remove Windshield Panel from box and place on a clean flat surface that won’t scratch the Windshield. Leave protective film on both sides of the Windshield Panel during installation process, except for areas noted in the instructions below.

3. Partially peel back the protective film along the bottom edge of the panel where the rubber Bulb Seal will be attached. Firmly press the Bulb Seal [Item 7] onto the bottom edge and contours of the Windshield Panel. See Illustration 1-1.

4. Cut any excess length of the Bulb Seal using a Shears or Wire Cutter at the ends of the Windshield Panel. See Illustration 1-2.

5. Partially peel back the protective film along the edge of the panel where the six Clamps [Item 2] will be located.

6. Attach two Clamps [Item 2] to the top of the Windshield using four Button Head Screws [Item 3], four Lock Washers [Item 4], and four Domed Shoulder Washers [Item 5]. Do not tighten hardware yet. See Illustration 1-3.

7. Position Windshield onto vehicle Roll Cage and leave Clamps in open position.

**Assembly Time:** Approximately 15 minutes

**Important:** This product is exclusively designed for your vehicle. Please read the installation instructions thoroughly before beginning. Installation is easier if the vehicle is clean and free of debris. For your safety, and to ensure a satisfactory installation, perform all installation steps correctly in the sequence shown.
7. Once attached to vehicle, attach four remaining Clamps to Windshield Panel and Roll Cage. Reference Clamp orientation from schematic on page 1. Do not fully tighten hardware yet. Leave Clamps in open position. See Illustration 1-4.

9. Close each Clamp and Insert one Button Head Screw [Item 3] and Lock Washer [Item 4] into the Clamp remaining thread. Do not tighten hardware yet.

10. Adjust position of Windshield Panel as necessary and assure the Bulb Seal is compressed along the Hood/Dash. See Illustration 1-5.

11. Tighten the twelve Button Head Screws [Item 3] that attach the six Clamps [Item 2] to the Windshield. Tighten to the specified torque.

13. Remove the protective film from both sides of the Windshield Panel.

14. Re-inspect hardware before and after riding or trailer-ing.
Windshield Cleaning Information:

- Remove all dirt, mud, dust and debris from Windshield with water before cleaning.
- Use a mild soap or dishwashing detergent along with a soft sponge or soft cotton cloth to clean Windshield surface. Do not apply in direct sunlight. Rinse with water immediately and dry with a soft cotton cloth or chamois.
- Always test cleaning agents in a small inconspicuous area prior to cleaning entire panel.
- Never use Windshield cleaning fluids (409, Windex, etc.), gasoline, high alkaline cleaners, or solvents.
- Never use abrasives, brushes, razor blades, scrapers, squeegees, gloves or dirty cloths.

For additional assistance, please contact Kolpin customer service department at (877) 956-5746 or (763) 478-5800 or email customerservice@kolpin.com.

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer’s control. In order to protect you and your ATV, certain parts of the accessory system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer’s warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
