Before you begin, please read these instructions and check to be sure all parts and tools are accounted for. The following instructions contain details required to install and service the contents of this kit.
OPERATING INSTRUCTIONS

Congratulations! You’ve just purchased the most durable plow component in the industry. Kolpin plow components work great for summer or winter plowing. With proper care and maintenance, your Kolpin plow system will last for years to come!

NOTICE

Plow operation requires additional components for operation: Kolpin Plow Blade, Kolpin Plow Push Frame, High Rise Plow Push Frame, Winch Kit *

*These components may be specific to your vehicle.

Please read and understand all assembly instructions, notices and warnings before assembling and operating your Kolpin plow system.

Follow these guidelines to ensure satisfactory operation:

• Read this manual and your ATV/ UTV operators manual before use.
• Periodically check for wear and tightness of all fasteners. Replace or re-torque fasteners as necessary.
• Before first use, set plow in the furthest right or left angled position to check for interference with the vehicle.
• Operate with extreme caution on slopes and rough terrain. Be familiar with the area before you plow.
• Be aware of immovable objects that could be hidden in the area you are plowing.
• To avoid damage when pushing snow into a pile, reverse direction before raising the plow blade.
• Do not ram the plow blade into piles of snow.
• For best results, set the suspension preload of your ATV/ UTV to the stiffest setting.
• To reduce steering effort and increase mobility, set the air pressure of your tires to the maximum pressure specification.
• The plow skids are adjustable. General skid setting is even with the plow wear bar bottom edge, higher settings reduce the chance of rocks and gravel from being collected.
• To increase traction during plow operation, operators can try: Securing weight to the ATV/ UTV for additional tire downforce, reducing tire air pressure, or installing tire chains.

SAFETY INFORMATION

Our plow systems were designed with your safety in mind. Please read and understand all Cautions, Notices and Warnings in this manual before you begin. In order to protect you and your ATV/UTV, certain parts of the plow system and/or hardware are designed to fail when the equipment is over-stressed.

WARNING

TO AVOID SERIOUS INJURY OR DEATH:
1. DO NOT EXCEED 5 MPH (8 KMH) WITH BLADE INSTALLED
2. OPERATE WITH EXTREME CAUTION ON SLOPES, STEEP GRADES, AND ROUGH TERRAIN
3. ALLOW NO RIDERS ON BLADE OR ATV WHILE MOVING OR STATIONARY
4. KEEP BYSTANDERS AWAY FROM THE BLADE OR ATV WHILE MOVING OR STATIONARY
5. WHEN PUSHING HEAVY MATERIAL, DIRECTION CONTROL MAY BECOME DIFFICULT
6. BEFORE ADJUSTING BLADE: STOP ATV ENGINE; SET AND LOCK BRAKES; RAISE AND LOCK BLADE
7. LOWER BLADE TO DOWN POSITION WHEN BLADE AND ATV ARE NOT IN USE
8. READ BLADE INSTRUCTION SHEETS AND ATV OWNER’S MANUAL

BEFORE YOU BEGIN:

- Your Kolpin accessory is exclusively designed for your vehicle
- Please read and understand all instructions
- Verify all parts and tools are accounted for
- To ensure a satisfactory installation, follow all steps correctly and in the sequence described
- Keep these instructions for future reference or for informational requests
- To facilitate installation, make sure that your vehicle is clean and free of debris
- All directions referring to right and left are when the rider is sitting on the machine
- The plastic skid plate will need to be modified to be reinstalled on the vehicle.

TOOLS REQUIRED:

- Basic Metric Wrench and Socket Set
- Drill or cutting tools for plastic

APPROXIMATE ASSEMBLY TIME: 30 minutes

Note: Removal and modification of the plastic skid plate is recommended.

Note: If any hardware is missing, do not return to the store. Call us to help, Toll Free 1-877-956-5746.

Spare Kit Notes:

- Spare kits may contain extra hardware that is used for other mount kits. Extra hardware can be discarded.
- U-bolts supplied in spare kits may be longer than original and may need to be cut to size.
Installation Preparation:

1. Arrange the mount plate (item #1), long hex bolts (item #8) and spacers as shown. Secure the mount sub-assembly using the push nuts (item 11) and push the clip down onto the bolt threads using 12mm socket. You can also pre-install the carriage screws and locknuts (items #9 and #10). (See illustration 1-1 and parts diagram on page 3). *Note, the lock washer (item #12) will be placed in between the mount plate and bolt head. Only the front and rear welded nut brackets (items #2 and #3) will remain to assemble to vehicle.*

2. From under the vehicle, locate the four circle opening cut outs in the front metal skid plate, under the front gearcase as shown. (See illustration 1-2).
Mount Plate Installation:

3. Insert the two rear welded nut brackets (item #3) into the skid plate circle opening cut outs as shown. (See illustration 1-3).

4. From behind the front right wheel, insert the front welded nut bracket (item #2) under the front gearcase and position over to the skid plate circle opening cut out as shown. (See illustration 1-4).

5. Both welded nut brackets should be visible from under the vehicle looking through the circle openings in metal skid plate as shown. (See illustration 1-5).
Mount Plate Installation (continued):

6. Lift and attach the mounting plate sub-assembly from step 1 up to the metal skid plate as shown. (See illustration 1-6).

7. Thread the front M8 bolts into the front welded nut bracket, followed by the rear M8 bolts. (See illustration 1-7). **Note, do not tighten at this step.**

8. Tighten the M8 bolts (item #8) for securing the mount sub-assembly to vehicle. Use caution to not overtighten bolts. (See illustration 1-8).

9. The universal mount plate, not included in this kit, will be attached to the Talon mount plate. The M8 carriage bolts (item #9) will fasten the universal plate with the M8 locknuts (item #10). Tighten to M8 specification. (See illustration 1-8). **Note, universal mount plate adapter is not shown.**

One Year Limited Warranty

For the period of one (1) year from the purchase date, Kolpin will replace for the original purchaser, free of charge, any part or parts found upon examination by Kolpin to be defective in material, workmanship, or both.

All transportation costs incurred submitting product to Kolpin for warranty consideration must be borne by the purchaser. If Kolpin determines that the product must be returned to the factory for credit, please call 1-877-956-5746 for a Return Merchandise Authorization (RMA) number and shipping instructions.

This warranty does not apply to parts that have been damaged by accident, alteration, abuse, improper maintenance, normal wear, or other causes beyond the manufacturer's control. In order to protect you and your ATV, certain parts of the plow system and/or hardware are designed to fail when the equipment is over-stressed. Parts that are lost due to loosening and improper maintenance are not covered under warranty. This warranty does not cover removal or reinstallation labor fees of the plow system and related components.

Peripheral products such as engines, electric motors, and actuators may carry an original manufacturer's warranty. Most hardware is general in nature and is easily obtained locally. Be sure to replace with minimum metric class 8.8 specification.
